

Name 1:

Name 2:

You have two tables:

Parts(pid, name)

1	Wrench
2	Saw
3	Hammer

Catalog(pid, sid, price)

2	Sears	4
2	CT	1.4

Write queries that answer the following:

1) What pids have an average price bigger or equal than 10? List the pid, and the average price.

2) For **every** pid in Parts, list its average price. The result should include the pid and its average price.
